Academic Credentials

- **Daffodil International University** **Dhaka, Bangladesh**
  Graduated with Honors, B.Sc. in Computer Science and Engineering ***Dec 2019 – Mar 2024***
  CGPA: **3.86** out of **4.00**
  Relevant courses: Algorithms, Operating systems, Data structures, Data mining, Database management system, Artificial intelligence, Software engineering

Professional Experience

- **Full Stack Developer Intern** **Dhaka, BD**
  DeshIt BD | *React, Node.js, Express.js, MongoDB, Tailwindcss* *Jan 2025 – Apr 2025*
  - Led the full-stack development of a POS system, architecting major modules like inventory and expense management.
  - Scaled the application from a basic MVP to a comprehensive product serving **20+ active restaurant clients**, executing weekly feature rollouts based on client requirements.

- **AI Data Annotator** **Remote**
  Outlier AI *Jun 2024 – Sep 2024*
  - Optimized the model's code-generation capabilities by identifying and fixing syntax and logic flaws in thousands of AI-generated responses.
  - Authored complex coding scripts in Python, C++, JavaScript, and SQL to fine-tune the model's understanding of different syntax and frameworks.
  - Ensured proper quality analysis and alignment by conducting detailed peer reviews of fellow analysts' work

Projects

- **Best Tuition BD** | *React, Node.js, MongoDB*
  - Architected a production tuition marketplace connecting students/guardians with qualified tutors.
  - Designed and implemented an end-to-end request–application–approval workflow with role-based access control.
  - Built an administrative dashboard to manage users, requests, assignments, and platform content.

- **Pandamarks** | *React, Shadcn, Framer motion, Redux, Express, MongoDB* Link
  - Web application to streamline the way users save, organize, and retrieve their favorite websites
  - Focused on presenting user bookmarks in a visually appealing way

- **Downwatch** | *React, Node.js, Express, MongoDB* Source code
  - Uptime and downtime monitor for your websites
  - A full-stack MERN application that monitors website uptime and sends email notifications when a site goes down or comes back up

- **Solar System** | *C++, OpenGL, GLUT* Source code
  - Solar system animation using OpenGL and GLUT, showcasing detailed 2D models (planets, moons, and other celestial bodies)

Technical Skills

- **Programming Languages:** C++, JavaScript, GoLang, HTML, CSS, SQL
- **Frameworks, Libraries & Databases:** React, Redux, Node.js, Express.js, MongoDB, PostgreSQL, Socket.IO
- **Developer Tools:** Git, GitHub, Postman, VS Code, Vercel

Interests

- Competitive programming and algorithmic problem solving
